Dear Parents/Guardians,

DONATION OF HAND SANITISER AND FACE SHIELD

Welcome back to school!

As you prepare your child to return to school after many weeks at home, there will no doubt be adjustments to be made. We'd like to help make the adjustments a little smoother, by providing two items which are becoming more familiar parts of our lives.

Firstly, we are pleased to provide every child with two bottles of hand sanitiser. One is a 50ml bottle which can be easily attached to your child's bag. The second is a larger 500ml bottle which comes with a pump, which we hope will come in useful when the smaller bottle runs out, and you need to refill it.

We have specially prepared a sanitiser which is made up of 40% isopropyl alcohol, and 0.1% benzalkonium chloride, which studies show can inactivate coronaviruses.

Secondly, we will also be providing your child [2 years old and above] with a red hat which comes with a plastic shield. Given that young children may not be able, or be less willing, to wear masks for an extended period of time, we thought a hat with a plastic shield will be helpful.

We are working hard to distribute the items within your child's first two weeks in school, but we hope you will understand that there may be some slight delays. We hope you find the sanitisers and hat useful. Keep safe. Stay prepared.

Yours Sincerely

Koh Lin-Net
