TELEVISION

Cathode ray tube TV

Flat screen TV

Hey Parents!

This activity encourages creative and critical thinking. Encourage your child to imagine and draw what technologies could look like in future. Follow up with questions such as "Why did you draw this?" or "How would this work?". You may also ask other questions such as "What else can it do?" or "Is there a different way to do it?" to challenge and facilitate your child's critical thinking.
