

# Mystery Reader

## DESCRIPTION

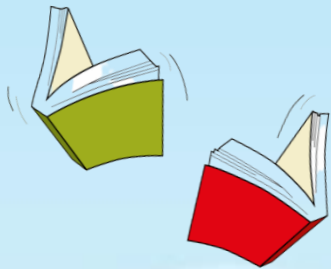

Mystery Reader provided fun, exciting and meaningful learning experiences for children to develop their language and literacy skills and a love for reading through dramatization and storytelling. The teachers and even parents dressed as characters from the storybooks, making the stories come alive.

## OBJECTIVES

Mystery Reader aimed at:

- equipping children with fundamental skills to make reading an essential part of their lives and
- strengthening partnership with parents so that they can support and be actively involved in their child's learning.

## PROCESSES

- ❖ Mystery Reader was conducted in three languages; English, Mandarin and Malay.
- ❖ The classrooms were designed based on the theme of the storybook.
- ❖ Parents were also invited to be Mystery Readers.

## OUTCOMES AND IMPACT

The children developed a love for books and interest in reading. The teachers found this enhanced the children's critical thinking, language and literacy skills, creativity and imagination. The children also showed an improvement in their comprehension skills and were able to respond to questions appropriately.

Moving forward, we would like to invite children from around the neighbourhood to watch the storytelling sessions and provide a platform for them to perform.
